

2009 Hospital Radiology Procedure and Purchasing Trends: A Semi-Annual Update, Fall 2009

Table of Contents

I.	Objectives	I-1
II.	Executive Summary	II-1
III.	Methodology	III-1
IV.	Findings.....	IV-1
A.	Background on Radiology Departments in Respondent Hospital Sample	IV-1
	• Distribution of sample hospitals by bed size categories.....	IV-1
	• Distribution of sample hospitals by types	IV-1
	• Distribution of sample hospital locations by U.S. census region	IV-2
	• Distribution of sample hospital locations by type	IV-3
	• Number of radiologists per respondent hospital.....	IV-4
	• Recent changes in level of competition in local diagnostic imaging services markets	IV-4
B.	Recent Trends in Hospital Radiology Department Procedure Volumes	IV-7
	• Annual volumes of diagnostic imaging procedures in radiology departments	IV-7
	• Comparison of 2009 YTD and 2008 average monthly imaging procedure volumes, by modality	IV-8
	• Expected changes in imaging procedure volumes, by modality, YTD 2009 vs. Q2 2010,	IV-14
	• Short-term challenges to maintaining or growing revenues from imaging services	IV-15
	• Modalities and procedures for which patients must obtain pre-certification	IV-17
	• Recent impact of pre-certification requirements on imaging volumes, by modality	IV-19
	• Modalities expected to experience the greatest revenue changes, 2008 to 2009	IV-20
	• Reasons for expected declines in year-to-year revenues from selected modalities.....	IV-23
C.	Trends in Capital Budgets for Imaging Equipment Acquisitions.....	IV-24
	• 2009 capital budgets for diagnostic imaging equipment and related system purchases.....	IV-24
	• 2009 actual capital spending for diagnostic imaging equipment and related systems	IV-26
	• Primary reasons for differences between 2009 capital budgets and actual spending.....	IV-28
	• Specific plans for acquiring diagnostic imaging equipment in 2009 and 2010	IV-29
	• Diagnostic imaging equipment purchases included in 2009 and 2010 capital budgets	IV-35
	• Prevalence and impact of capital equipment spending freezes	IV-36
	• Expected timing of when capital equipment spending freezes/restrictions will be lifted	IV-38
	• Changes needed before capital equipment spending freezes/limitations are lifted	IV-40
	• Potential interest in acquiring OEM-certified refurbished equipment	IV-41
	• Possible downgrades to equipment technology or feature requirements	IV-44
	• Recent experiences with capital equipment financing companies	IV-45

D. PACS and MIS Implementation and Upgrade Plans for 2010	IV-47
• Current status of PACS implementation	IV-47
• Age of existing PACS systems	IV-47
• Plans for investment in PACS upgrades and replacements	IV-48
• Budgeted vs. actual PACS upgrades, YTD 2009	IV-49
• Types of PACS upgrades planned for 2009 or 2010	IV-52
• Investment in new PACS installations in 2009 or 2010	IV-56
• Reasons for acquisition of new PACS in 2009 or 2010	IV-57
• Management information systems to be implemented between now and end of 2010	IV-58
E. Other Expected Changes for Radiology Departments During 2010	IV-59
• Diagnostic imaging procedures to begin offering during 2010	IV-59
• Diagnostic imaging procedures to be discontinued in 2010	IV-59
• Staffing limitations currently in effect in radiology departments	IV-61
• Hospital-based capital projects planned between now and end of 2010	IV-65
• Expected changes in facility operations during first half of 2010	IV-66
• Expected changes in the number of local imaging facilities in the next nine months	IV-68
• Expectations about facility's financial condition at the end of first half 2010	IV-69
• Expected impacts of U.S. Healthcare Reform legislation	IV-70
