# 2005 Nuclear Medicine Census Market Summary Report

## Table of Contents

I. Objectives.........................................................................................................................................I-1  
II. Executive Summary.......................................................................................................................II-1  
III. Methodology ..................................................................................................................................III-1  
IV. Findings .........................................................................................................................................IV-1  
   A. Nuclear Medicine Patient Visits and Procedure Volume .......................................... IV-1  
   B. Radiopharmaceuticals and Pharmacological Stress Agents................................. IV-13  
   C. Nuclear Medicine Cameras - Installed Base .............................................................. IV-38  
   D. Nuclear Medicine Computers - Installed Base ........................................................ IV-51  
   E. Nuclear Medicine Equipment Purchase Plans ......................................................... IV-60  
   F. Networking for Nuclear Medicine Images................................................................. IV-73  
   G. Site Operations Characteristics ........................................................................... IV-83
2005 NUCLEAR MEDICINE CENSUS MARKET SUMMARY REPORT

EXHIBITS

A. Nuclear Medicine Patient Visits and Procedure Volume
1. Nuclear Medicine Sites, Patient Visits and Procedures, 2005 .......................................................... IV-1
2. Total Number of Nuclear Medicine Patient Visits, Hospital and Non-Hospital Sites, 1995-2005 ........ IV-1
3. Average Nuclear Medicine Patient Visits per Site, by Site Type, 1999-2005 ........................................ IV-2
4. Total Nuclear Medicine Procedure Volume, Hospital and Non-Hospital Sites, 1995-2005 .................. IV-2
5. Average Nuclear Medicine Procedures Performed per Site, Hospital and Non-Hospital Sites, 1999-2005 ........................................................................................................ IV-3
6. Average Nuclear Medicine Procedures Performed per Site, by Site Type, 2005 ................................ IV-3
7. 2005 Nuclear Medicine Procedure Mix, All Sites .............................................................................. IV-4
8. Total Number of Nuclear Medicine Patient Visits, by Procedure Type, All Sites, 2005 ..................... IV-4
9. Distribution of Nuclear Medicine Patient Visits by Procedure Type, Hospitals and Non-Hospitals, 2005 ........................................................................................................ IV-5
10. Distribution of Nuclear Medicine Procedures or Patient Visits by Procedure Type, Hospitals and Non-Hospitals, 1999-2005 ........................................................................................ IV-5
11. Hospital vs. Non-Hospital Mix of Nuclear Medicine Procedures or Patient Visits by Procedure Type 1999-2005 ........................................................................................................ IV-6
12. Percent of Sites Performing Nuclear Medicine Procedures, by Procedure Type, Hospitals and Non-Hospitals, 2005 ................................................................................................... IV-7
13. Average Number of Nuclear Medicine Patient Visits per Site Performing, by Procedure Type, Hospitals vs. Non-Hospitals, 2005 .................................................................................. IV-8
14. Distribution of Tumor Localization Patient Visits, by Cancer Type, 2005 ........................................ IV-9
15. Percent of Nuclear Medicine Sites Performing Tumor Localization Studies, by Cancer Type, Hospitals and Non-Hospitals, 2005 .................................................................................. IV-9
16. Inpatient vs. Outpatient Mix, 1995-2005 ............................................................................................ IV-10
17. Nuclear Medicine Sites Reporting that Their Facility Performs Stress Echo, by Site Type, as of 2005 Census ..................................................................................................................... IV-10
18. Distribution of Nuclear Medicine Sites Performing or Planning to Perform PET Procedures Using PET Technology, by Site Type, 2005 .................................................................................. IV-11
19. Type of PET Technology Planned by Nuclear Medicine Sites Planning to Perform PET Procedures Over the Next Three Years, by Site Type, 2005 ........................................................................ IV-11
20. Estimates of Annual U.S. Nuclear Imaging Procedures or Patient Visits, 1992-2005 ........................ IV-12

B. Radiopharmaceuticals and Pharmacological Stress Agents
1. Facilities Performing Radionuclide Therapy, by Site Type, as of 2005 Census ........................................ IV-13
2. Whether Respondent’s Department Performs Radionuclide Therapy, as of 2005 Census .................. IV-13
3. Number of Patients Treated with Radionuclide Therapy, 1995-2004 ................................................ IV-14
4. Average Annual Number of Patients Treated with Radionuclide Therapy, per Site Performing, by Site Type, 2004 ........................................................................................................ IV-14
5. Average Annual Number of Patients Treated with Radionuclide Therapy, per Site Performing, 1995-2004 ................................................................................................................... IV-15
6. Radionuclide Therapy Patient Volume, by Radioactive Agent, 1997-2004 ........................................ IV-16
7. Percent of Radionuclide Therapy Sites Using Specific Radionuclide Therapy Agents, by Site Type, 2004 ..................................................................................................................... IV-17
8. Sites Performing and Patients Receiving Myocardial Ischemia/Perfusion Scans, by Site Type, 2005 ...... IV-18
9. Number of Patients Receiving Myocardial Ischemia/Perfusion Scans, by Site Type, 2001-2005 ........ IV-18
10. Number of Sites Performing Myocardial Ischemia/Perfusion Scans, by Site Type, 2001-2005 .......... IV-19
12. Average Myocardial Perfusion Patient Visits Using Gated SPECT per Site, by Site Type, 2005 .......... IV-20
13. Radioactive Agents Used for Myocardial Ischemia / Cardiac Perfusion Patient Visits, 2005 ............. IV-20
14. Percentage of Cardiac Perfusion Studies Using Specific Isotopes, 1997-2005 ............................... IV-21
C. Nuclear Medicine Cameras - Installed Base

1. Distribution of Nuclear Medicine Sites and Cameras, Hospital and Non-Hospital Sites, as of 2005 Census ................................................................. IV-38
2. Installed Base of Nuclear Medicine Cameras, in Hospital and Non-Hospital Sites, by Census Year, 1995 to 2005 ................................................................ IV-38
3. Distribution of Sites, by Number of Nuclear Medicine Cameras Installed, by Site Type, as of 2005 Census ............................................................... IV-39
4. Percent Distribution of Camera Installed Base, by Manufacturer, as of 2005 Census ........................................................................ IV-39
5. Installed Base of Nuclear Medicine Cameras, by Manufacturer, by Census Year, 1999/2000 to 2005 .............................................................. IV-40
6. Percent Distribution of Camera Installed Base, by Manufacturer, by Census Year, 1995 to 2005 .............................................................. IV-41
7. Camera Installed Base, by Year of Installation, as of 2005 Census ................................................................................................. IV-41
8. Distribution of Nuclear Medicine Camera Installed Base, by Year of Installation, Hospital and Non-Hospital Sites, as of 2005 Census ....................... IV-42
9. Camera Installed Base Market Share, by Year of Installation, from 2000 to 2005, as of 2005 Census ......................................................... IV-42
10. Installed Base of Nuclear Medicine Cameras, by Type, by Census Year, 1999/2000 to 2005 .......................................................... IV-43
11. Distribution of Camera Installed Base, by Camera Type, by Site Type, as of 2005 Census ............................................................... IV-43
D. Nuclear Medicine Computers - Installed Base

1. Distribution of Nuclear Medicine Sites and Computers, Hospital and Non-Hospital Sites, as of 2005 Census ............................................. IV-51
2. Installed Base of Nuclear Medicine Computers, Hospital and Non-Hospital Sites, by Census Year, 1995 to 2005 ........................................ IV-51
3. Whether Nuclear Medicine Computers are Separate from or Integrated with Cameras, as of 2005 Census ........................................... IV-52
4. Percent Distribution of Computer Installed Base, by Manufacturer, as of 2005 Census ................................................................. IV-52
5. Installed Base of Nuclear Medicine Computers, by Manufacturer, by Census Year, 1999/2000 to 2005 ............................................... IV-53
6. Percent Distribution of Nuclear Medicine Computer Installed Base, by Manufacturer, by Census Year, 1995 to 2005 ............................. IV-54
7. Computer Installed Base, by Year of Installation, as of 2005 Census ........................................................................ IV-54
8. Distribution of Nuclear Medicine Computer Installed Base, by Year of Installation, Hospital and Non-Hospital Sites, as of 2005 Census ........................................................................ IV-54
10. Percent of Sites with Specified Nuclear Medicine Computer Software Capabilities for Cardiac Studies, by Census Year, 1999/2000 to 2005 ................................................................................................. IV-56
11. Finance Method for Installed Nuclear Medicine Computers, by Site Type, as of 2005 Census .............................................................. IV-56
12. Percent of Sites Familiar with the Concept of Image Fusion, by Site Type, as of 2005 Census ............................................................... IV-57
13. Whether Sites Familiar with Image Fusion Currently or Plan to Combine Nuclear Medicine Images with Other Images, as of 2005 Census ........................................................................ IV-57
14. Whether Sites Familiar with Image Fusion Currently or Plan to Combine Nuclear Medicine Images with Other Images, by Site Type, as of 2005 Census ................................................................. IV-58
15. Whether Sites Familiar with Image Fusion Currently or Plan to Combine Nuclear Medicine Images with Other Images, by Census Year, 1999/2000 to 2005 ................................................................................................. IV-58
16. Type of Images Currently Combined with Nuclear Medicine Images, by Site Type, as of 2005 Census ................................................................ IV-59
17. Type of Images to be Combined with Nuclear Medicine Images, by Site Type, as of 2005 Census ............................................. IV-59
E. Nuclear Medicine Equipment Purchase Plans
1. Camera Type Planned for Next Purchase, as of 2005 Census ................................................................. IV-60
2. Camera Type Planned for Next Purchase, by Site Type, as of 2005 Census ........................................ IV-61
3. Distribution of Planned SPECT/CT Units, by Number of CT Slices Planned, as of 2005 Census ....... IV-61
4. Intended Applications for Planned Camera Purchases, as of 2005 Census ......................................... IV-62
5. Percent of Cameras Planned with Coincidence Detection Capability, as of 2005 Census ................. IV-62
6. Percent of Cameras Planned with Attenuation Correction Capability, as of 2005 Census ............... IV-63
7. Percent of Computers Planned to be Separate from vs. Built into Cameras, as of 2005 Census ....... IV-64
8. Plans for Purchasing Reconditioned Nuclear Medicine Equipment, as of 2005 Census .................... IV-64
9. Percent Distribution of Sites Mentioning Vendors Considered for Next Nuclear Medicine Equipment Purchase, as of 2005 Census .................................................................................................................. IV-65
12. Plans for Replacement vs. Additional Cameras and Computers, Hospitals and Non-Hospitals, as of 2005 Census ........................................................................................................................................ IV-68
13. Intended Financing Method for Next Camera and Computer Acquisition, Hospitals and Non-Hospitals, as of 2005 Census ........................................................................................................................................ IV-68
14. Distribution of Sources for Service Support of Nuclear Medicine Equipment, by Site Type, as of 2005 Census ........................................................................................................................................ IV-69
15. Current and Planned Equipment Service Support by Modem, by Site Type, as of 2005 Census ....... IV-69
16. Distribution of 2005 Nuclear Medicine Equipment Budgets, All Sites ............................................. IV-70
17. Nuclear Medicine Equipment Budget Trend, 2000-2005 ..................................................................... IV-70
18. 2005 Nuclear Medicine Equipment Budget Distribution, by Site Type .............................................. IV-71
19. Average Nuclear Medicine Equipment Budget per Site Having a Budget, by Site Type, 2000-2005........ IV-71
20. Buying Group Influence on Nuclear Imaging Equipment Purchases, as of 2005 Census ................. IV-72
21. Buying Group Influence on Nuclear Imaging Equipment Purchases, Hospital vs. Non-Hospital Sites, as of 2005 Census ........................................................................................................................................ IV-72

F. Networking for Nuclear Medicine Images
1. Current Use of Networks to Transmit Nuclear Medicine Images, by Site Type, as of 2005 Census ...... IV-73
2. Nuclear Medicine Sites Using Networks, by Year of Network Installation, as of 2005 Census ......... IV-73
3. Software Vendors of Networks Used for Nuclear Medicine Images, as of 2005 Census .................. IV-74
4. Whether Network Used for Transmission of Nuclear Medicine Images is Web-Enabled, by Site Type, as of 2005 Census ........................................................................................................................................ IV-74
5. Whether Network Used for Transmission of Nuclear Medicine Images Uses DICOM, by Site Type, as of 2005 Census ........................................................................................................................................ IV-75
6. Whether Network Used for Transmission of Nuclear Medicine Images Also Transmits Other Images, by Site Type, as of 2005 Census ........................................................................................................................................ IV-75
7. Whether Other Images Transmitted are from Radiology vs. Cardiac Modalities, by Site Type, as of 2005 Census ........................................................................................................................................ IV-76
8. Whether Nuclear Medicine Image Network Interfaces to RIS, by Site Type, as of 2005 Census ......... IV-76
9. Whether Nuclear Medicine Image Network Interfaces to HIS, by Site Type, as of 2005 Census ....... IV-77
10. Proportion of Sites Planning to Buy, Replace or Expand their Network Capability for Nuclear Medicine Images, by Site Type, as of 2005 Census ........................................................................................................................................ IV-77
11. Sites Planning to Purchase Networks for Nuclear Medicine Images, by Whether they Currently Have Networks, as of 2005 Census ........................................................................................................................................ IV-78
12. Proportion of Sites Planning to Buy Nuclear Medicine Image Transmission Capability for an Existing Network or Purchase a New Network, by Site Type, as of 2005 Census ........................................................................................................................................ IV-78
13. Current Type of Network Nuclear Medicine Image Transmission Capability is being Added to, Hospitals and Non-Hospitals, as of 2005 Census ........................................................................................................................................ IV-79
G. Site Operations Characteristics

1. Department Operating Nuclear Medicine Equipment, by Site Type, as of 2005 Census ........................................ IV-83
2. Year Facility Started Performing Nuclear Medicine Studies, Hospitals and Non-Hospitals, as of 2005 Census ......................................................... IV-83
3. Average Nuclear Medicine Procedures per Camera, Hospital and Non-Hospital Sites, 1999-2005 .................. IV-84
4. Estimated Total FTE Staffing of Nuclear Medicine Sites, by Staff Type, as of 2005 Census .......................... IV-84
5. Estimated Technologist FTE Staffing of Nuclear Medicine Hospital and Non-Hospital Sites, by Census Year, 1999/2000 to 2005 .......................................................... IV-85
6. Percent of Nuclear Medicine Sites with Staff Types, as of 2005 Census ....................................................... IV-85
7. Percent of Nuclear Medicine Sites with Staff Types, by Site Type, as of 2005 Census ............................... IV-86
8. Average Number of FTE Staff per Site Employing that Staff Type, by Site Type, as of 2005 Census ...... IV-87
9. Average Number of Technologist FTEs per Site, by Census Year, 1999/2000 to 2005 ............................... IV-87
10. Average Annual Nuclear Medicine Procedures per Technologist FTE, Hospital and Non-Hospital Sites, 1999 to 2005 .................................................................................................. IV-88
11. Average Annual Nuclear Medicine Patients per Technologist FTE, Hospital and Non-Hospital Sites, 1999 to 2005 .................................................................................................. IV-88
12. Percent of Nuclear Medicine Sites Having Physicians Reading Scans, and Average Number of Physicians per Site Having, by Full or Part-Time Status, as 2005 Census ........................................ IV-89
13. Average Number of Physicians Reading Nuclear Medicine Scans per Site Having, by Full or Part-Time Status, by Site Type, as of 2005 Census ........................................ IV-89
14. Distribution of Sites, by Total Physicians that Read Nuclear Medicine Scans, as of 2005 Census .......... IV-90
15. Average Annual Nuclear Medicine Procedures Read per Site, per Physician, by Site Type, 2005 .......... IV-90
16. Specialties of Physicians Reading Nuclear Medicine Scans in Hospital and Non-Hospital Sites, as of 2005 Census ........................................................................................................ IV-91
17. Whether Nuclear Medicine Exams are Sent to an Off-Site Radiology Service to be Read, as of 2005 Census ........................................................................................................ IV-91
18. Average Waiting Time for a Non-Emergency Outpatient Visit for a Nuclear Medicine Study, Hospital and Non-Hospital Sites, as of 2005 Census ........................................................ IV-92
20. Hours per Week (Monday-Friday) Nuclear Medicine Department Open for Scheduled Procedures, by Site Type, as of 2005 Census .................................................................................. IV-93
21. Hours per Weekend Nuclear Medicine Department Open for Scheduled Procedures, by Site Type, as of 2005 Census .................................................................................................. IV-93
22. Total Hours per Week (Monday-Friday) Nuclear Medicine Department Open, Including On-Call, by Site Type, as of 2005 Census .................................................................................. IV-94
23. Total Hours per Weekend Nuclear Medicine Department Open, Including On-Call, by Site Type, as of 2005 Census ........................................................................................................ IV-94
24. Reimbursement Sources for Nuclear Medicine Patient Billings, as of 2005 Census ................................ IV-95
25. 2005 Nuclear Medicine Patient Visits per Thousand Population, by State ........................................ IV-96
